Overview

Over a year in the making, **The Brother Kite's** *Moonlit Race EP* has undergone several conceptual changes as time has moved on. The final product is one to cherish. Originally conceived as a single for "Get On, Me" - arguably the catchiest song on their masterful sophomore album *Waiting For The Time To Be Right* - the EP stays true to form by leading off with that track. From there on, the listener is treated to five exclusive tracks. We are treated to alternate versions and mixes of two album tracks from *WFTTTBR*, including the title cut and "Hopeless and Unsung". A never-before-released live version of "Never in Years" from a **WERS 88.9** radio session in Boston is also included. Sandwiched in the middle of the disc are two solid non-album tracks. "Unearthed/Digging in the Dirt" is taken from **DJ Potter's** creepy child-zombie short film 'Of All That Is Unearthed'. The track "Half Century" appears here in hard-copy format for the first time. The track was originally recorded for the most recent **Adult Swim** download compilation entitled *Warm and Scratchy*, and saw the band sitting comfortably alongside an impressive array of indie notables such as **The Rapture, TV On The Radio, The Raveonettes, Fennesz, Broken Social Scene, The Liars, Asobi Seksu, Amusement Parks on Fire, Les Savy Fav**, and more.

In addition to the six audio tracks, the CD has enhanced content featuring three videos! The alternate version of "Hopeless and Unsung" gets paired with an artistically-shot video. "I'm Not The Only One" has been a fan-favorite over the past year, having been downloaded off the band's website and YouTube more than 5,000 times. The video is beautifully and professionally shot, and appears here on an official format for the first time. The disc is wrapped up with a funny, behind-the-scenes, home-shot video by the band about the recording of the penultimate album track "Get On, Me".

Press for *Waiting For The Time To Be Right*

"...easily one of the best albums you'll hear this year... With any luck, the Brother Kite's confident strides on *Waiting* will be rewarded with the sort of attention that has eluded them thus far." – *Popmatters*

"The Brother Kite slip right past the sky on their guitars and into low orbit here, and it's a pleasure to join them there." – *Pichforkmedia.com*, **Rating 7.6**

"When you consider the fact that the public happily supports the shittiest artists in the world...it seems tragic that credible real bands like Brother Kite seem to be overlooked. No matter. Based on the sounds we're hearing here...these folks obviously have music in their hearts. The inherent sincerity is amazing. Fantastic stuff. Recommended." – *Babysue*, **(Rating: 5++)**

"The Brother Kite, "Waiting for the Time to Be Right" - If there's ever going to be a 21st century Beach Boys, here's our best shot. Full of sunny, robust choruses that fly in from 100 miles away, "Waiting" is the headphone album of the year." – *The Flint Journal*, **#7 best album of 2006**

"For fans of orchestral pop, consider *Waiting for the Time to Be Right* a necessary addition to your arsenal." – *Northeast Performer Magazine*, **Album of the Month**
